PROFESSIONAL SUMMARY

Driven and adaptable Software Engineering aspirant with a strong commitment to delivering high-quality solutions and contributing to organizational success. I excel in collaborative environments through effective communication, teamwork, and a proactive approach to problem-solving. Dedicated to understanding client requirements, adapting to evolving business needs, and maintaining professionalism, accountability, and continuous learning. Passionate about creating reliable software solutions that add value to both the organization and its customers while continuously enhancing my technical and professional skills.

EDUCATION

Nandha Engineering College, B.E Internet of Things 2023 - 2027 | CGPA :8.3/10

TECHNICAL SKILLS

Languages:Java,HTML,CSS

Cloud:AWS (S3,EC2,IAM,Static Website Hosting)

Tools:Git,GitHub,VS Code,AutoCAD

Core:DBMS,Operating System,Computer Networks,OOP

EXPERIENCE

NandhaInfoTech

- Learned IoT fundamentals and built a smart home automation system using Arduino, ESP8266, and DHT11 sensors.
- Integrated the project with the Blynk IoT platform for remote monitoring and control, and completed it with successful testing and final documentation.
- Collaborated with the team to develop and test application features, ensuring functionality and performance.

Elite System and Controls

- Completed an internship at Elite System and Controls, gaining hands-on experience in KiCad for schematic and PCB design.
- Designed PCB layouts, created circuit boards, and improved practical skills in electronics and embedded systems.
- Assisted in schematic design, PCB layout optimization, and board validation using KiCad.

TRAINING

Infosys Pragati Cohort 3 | Infosys

- Completed the 11-week Infosys Springboard Pragati: Path to Future – Cohort 3 program, gaining knowledge through technical courses and 4 days of on-campus soft skills training.

- Enhanced communication, teamwork, leadership, problem-solving, and professional skills, strengthening my confidence and preparing me for a career in technology.

PROJECTS

[RideBoard](#)

Tech Stack: React Native, Expo, Firebase Authentication, Cloud Firestore.

- Developed a cross-platform ride-sharing mobile application using **React Native** and **Expo**.
- Implemented **Firebase Authentication** to enable secure user sign-in and account management.
- Built features for **posting, browsing, editing, and deleting ride listings** with real-time data storage using **Cloud Firestore**.
- Designed a responsive and reusable user interface with modular components to improve code organization and maintainability.
- Managed project version control using **Git** and **GitHub**, and generated Android builds using **Expo EAS Build**.

[AWS Static Hosting](#)

Tech Stack: AWS, Amazon S3

- Hosted a static website on **Amazon S3** using AWS cloud services.
- Configured **S3 bucket permissions and public access settings** to enable website hosting.
- Deployed HTML, CSS, and JavaScript files to provide a live, publicly accessible website.
- Verified website functionality by testing file uploads, updates, and accessibility through the S3 static website endpoint.
- Gained practical experience with **cloud storage, website deployment, and AWS management console** operations.

CERTIFICATES

- AWS Cloud Practitioner
- JAVA Programing
- Pragati:Path to Future - Cohort 3
- Cloud Computing
